Homerton University Hospital.

Delivering specialist healthcare doorsets to a new elective surgical centre.

SDS supported the development of the Homerton Elective Centre in London, working with Ansell & Bailey, Quinn London and Homerton Healthcare NHS Foundation Trust to supply 134 Dfendoor doorsets for the extension and refurbishment of Block 5, helping create additional surgical capacity and a modern environment for planned patient care.

Customer: [Homerton Healthcare NHS Foundation Trust.](#)

Location: [London.](#)

Total project value: [£20m.](#)

Project type: [Extension and reburbishment.](#)

Main contractor:

ABOUT THE PROJECT

The Homerton Elective Centre was developed to increase the hospital's capacity for planned surgery and improve access to elective treatment. The new centre will enable up to 2,500 additional operations each year, helping to reduce waiting times and improve access to planned surgery.

The project includes two state-of-the-art operating theatres and a dedicated 10-bed ward for surgical patients, creating a purpose-designed environment to support elective surgical care. As part of the development, SDS provided specialist doorsets designed to meet the performance requirements of a modern healthcare environment.

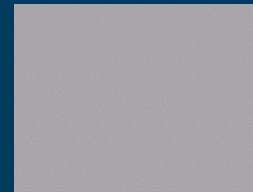

PROJECT DELIVERY

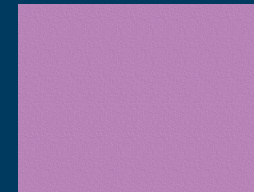

A total of 134 Dfendoor doorsets were supplied for the Homerton Elective Centre.

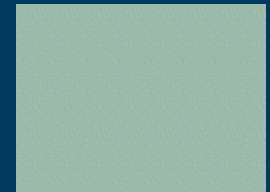

- The combination of Dfend Flint, Grape, and Jade finishes provided a consistent aesthetic across the new elective centre while incorporating the practical requirements of a healthcare environment.

Flint.

Grape.

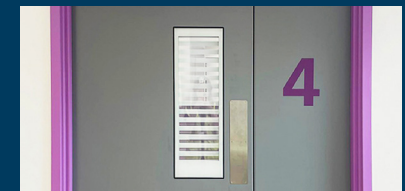

Jade.

- Satin stainless steel ironmongery was supplied as part of the doorset package, providing a durable and practical finish suitable for a healthcare environment.

- The doorsets incorporated Clearglaze, Priviglaze and Priviglaze + vision panel solutions. Timber flush and PVC bead options were used as part of the doorset package, providing suitable detailing for the different applications across the project.

Clearglaze.

Priviglaze.

- The project was phased across two halves, requiring coordination and project management support to help align the doorset package with the wider programme.

PROJECT OUTCOMES

SDS healthcare doorsets supplied:

Dfendoor:

Supporting the requirements of a busy surgical environment while meeting the specified fire performance requirements.

Key outcomes and benefits:

- ✔ Supplied 134 Dfendoor doorsets for the new Homerton Elective Centre.
- ✔ Supported the development of additional elective surgical capacity.
- ✔ Provided doorsets for a facility designed to enable up to 2,500 additional operations each year.
- ✔ Supplied specialist doorsets for an environment incorporating two operating theatres and a 10-bed surgical ward.
- ✔ Provided project management support across a two-phase project programme .

CONCLUSION

Summary.

The Homerton Elective Centre demonstrates SDS's ability to provide specialist healthcare doorsets for new surgical environments, supporting projects where performance, durability and coordinated delivery are essential.

Working alongside Homerton Healthcare NHS Foundation Trust, Ansell & Bailey and Quinn London, SDS supplied Dfendoor doorsets incorporating specialist vision panels, satin stainless steel ironmongery and a coordinated range of finishes.

With the project phased across two halves, SDS provided project management support to help coordinate the doorset package alongside the wider programme, contributing to the development of a new elective centre designed to increase surgical capacity and improve access to planned care.
