

CASE STUDY SPOTLIGHT

New National Hospital, Montserrat.

THE HEALTHCARE DOOR SPECIALIST

PROJECT OVERVIEW

New National Hospital, Montserrat.

**Specialist healthcare doorsets supporting
the future of healthcare in Montserrat.**

Specialist Door Solutions (SDS) partnered with RG Group and Article 25 to deliver healthcare doorsets for the New National Hospital St John in Montserrat. As a purpose-built facility designed to replace outdated healthcare infrastructure following the island's volcanic eruption, the new hospital is being engineered to withstand hurricanes and earthquakes while providing modern healthcare services for the local community.

Through careful planning, technical expertise, collaboration and coordinating international logistics, SDS is successfully delivering a specialist doorset package to support this landmark healthcare development in the Caribbean.

Customer:

Location:

St John, Montserrat.

Project type:

New build hospital.

Architect:

ABOUT THE PROJECT

The New National Hospital St John represents a significant investment in Montserrat's future healthcare provision. Following the devastating volcanic eruption that destroyed the island's capital in 1995, healthcare services had been operating from a former primary school.

The new 57,000 sq ft, 25-bed hospital is designed to provide a full range of healthcare services within a resilient facility capable of withstanding hurricanes and earthquakes.

SDS is supplying a complete specialist doorset package, working alongside the project team to coordinate production, logistics and delivery across international borders while maintaining the high standards required for a modern NHS healthcare environment.

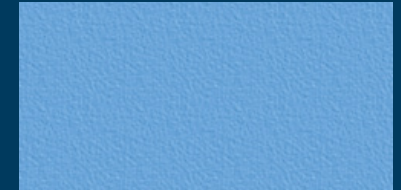

PROJECT DELIVERY

- Delivering a modern finish using Chalk doors with contrasting Lupin frames.

Chalk.

Lupin.

- Supplying Clearglaze vision panels to provide visibility and support safe movement throughout the hospital.
- Installing stainless steel ironmongery, provides durability and suitability for demanding healthcare environments.
- Delivering a package of fully fire-tested and compliant FD30S fire-rated doorsets, supporting the project's fire safety requirements.
- Installing stainless steel ironmongery, provides durability and suitability for demanding healthcare environments.
- Coordinating international logistics through specialist freight forwarding, ensuring products were successfully shipped to Montserrat by container.
- Managing production schedules and technical approvals across multiple time zones, maintaining programme momentum throughout manufacturing.
- Working proactively with the contractor to coordinate revised delivery schedules, logistics information and production signoffs.
- Providing responsive communication throughout the project to ensure manufacturing, shipping and delivery remain aligned with the construction programme.

PROJECT OUTCOMES

SDS healthcare doorsets supplied:

Provided enhanced durability and infection-control features, fully compliant with NHS theatre standards.

Key outcomes and benefits:

- ✓ Delivering a complete, fully fire-tested and compliant doorset package for a landmark international healthcare project.
- ✓ Supporting the construction of a resilient hospital designed to withstand hurricanes and earthquakes.
- ✓ Contributing to the rebuilding of Montserrat's healthcare infrastructure following the 1995 volcanic eruption.
- ✓ Successfully coordinating complex international logistics, manufacturing and freight requirements.
- ✓ Delivering durable healthcare doorsets with high-quality finishes suitable for a modern clinical environment.
- ✓ Maintaining programme continuity through proactive project management, technical coordination and responsive communication across international teams.

CONCLUSION

Summary.

The New National Hospital St John project highlights SDS's capability to deliver specialist healthcare doorset solutions on complex international healthcare developments. Working in partnership with RG Group and Article 25, SDS is successfully supplying and coordinating the delivery of 49 specialist doorsets to Montserrat, overcoming the logistical challenges of overseas construction while maintaining exceptional quality and service. The result will be a resilient, future-ready hospital that will provide modern healthcare facilities for the island's community for generations to come.

“The New National Hospital is a unique project that demonstrates SDS's ability to deliver specialist healthcare doorsets beyond the UK. By working closely with Article 25 and project team, we are able to coordinate manufacturing, logistics and technical approvals to deliver a solution that meets the performance requirements of a modern healthcare facility. We're proud to contribute to a project that will play such an important role in the future of healthcare for the people of Montserrat.”
